

Appendix D Instructions

Appendix D is a freeware program which allows the user to print a variety of labels and markings used to identify, accumulate or store, and transport hazardous, non-hazardous and universal wastes. It was originally designed for hazardous waste generators in the State of Washington but it has been modified to allow its use in other States.

The freeware was prepared using Microsoft Word and attempts to convert it to Corel WordPerfect have not been successful. To use the program, the user must locate a computer that has Microsoft Word.

The software program will allow the user to print:

- the EPA Hazardous Waste Marking,
- the DOT Corrosive and Flammable labels,
- the National Fire Protection Association (NFPA) marking,
- markings for:
 - Universal Waste,
 - used oil
 - antifreeze
 - paint wastes
 - photo wastes
 - several miscellaneous materials

To open the file, use a program like Microsoft Explorer and locate the folder "Appendix D Labeling Software" and click on it. When it opens, click on the file "HW Freeware". Scroll through the list index of labels and markings in the index and locate the label or marking that is needed and then click on it. When the label or marking appears, make the necessary entries if required and then print it.
